Subject: Creation and Delivery of Music Streaming Tutorials and Walkthrough

Dear [Sender],

We have taken this directive as an opportunity to boost user engagement by providing informative tutorials for the StreamStream music service on the Pattagansett server(.44). There is some excitement stirring up among the team as we begin the creation of two detailed tutorials along with a walkthrough video.

Tutorials on the WordPress Site:

1. Content Curator Tutorial:

Objective: Guide content curator on adding new music to the streaming service.

Captions/Screenshots: Step-by-step visual instructions with captions.

Hosting: The tutorial will be hosted on our WordPress site on the Nile server (.80).

Accessibility: We will ensure the tutorial is accessible via NAT through the firewall for public viewing.

Public IP Space: [provide public IP details for access]

2. User Access and Streaming Tutorial:

Objective: Assist typical users in accessing and streaming music on our service

Captions/Screenshots: User-friendly visuals with clear captions

Hosting: The tutorial will reside on the same WordPress site on the Nile server (.80)

Accessibility: NAT configuration will be in place for public access.

Public IP Space: [Provide IP details for access ]

Video Walkthrough:

Objective: create a video walkthrough that includes both tutorials

Content: the video covers the steps to access the tutorials on the wordpress site, followed by a demonstration of content curation and music streaming for at least 30 seconds

Commentary: during the walkthrough, provide commentary on best practices for safe internet surfing

Hosting: videos will be hosted on [Specify internal website/youtube]

Public Access: ensure public access to the videos required

Delivery and Access Details:

After the videos have been completed, a link will be provided to the WordPress page containing both tutorials. The blog post will also be shared via PDF printouts that include URL headers for distribution to the marketing team.

Thank you for your support for this user-focused initiative. We look forward to delivering informative content to the StreamSteam community.

If any specific preferences or considerations arise, please let us know.

Best regards,
