Date:

Logging Server Setup Request

Dear [   ],

We have received your request. A logging server will be set up and will be able to track the activity of the systems within the network. The logging server will be accessible by external monitors .Configuration will include the top five Log Levels (ex. Critical down to Warning). An user Account for Pedro Quincy with the username 'quincy' will also be created for monitoring purposes.

The following details are for the user account created for Pedro Quincy:

Username: pquincy
Password: [password]

To help Pedro to access the environment and the log server, a user guide has been prepared and attached to this email in a pdf format. The guide includes step-by-step instructions on logging in and accessing the log server. Please securely share this information with Pedro Quincy at your earliest convenience.

[Attached User Guide for "Logging Server"]

Due to containing vital information, we recommend sharing the user guide through a secure and/or encrypted method. We will aim to set up, configure, and test the logging server within the time constraints requested and will keep you updated on the progress.

If you have any further instructions or specific request regarding the logging server, please do not hesitate to let us know.

Best regards,
